The screenshot displays the Atom text editor interface. On the left, a code editor shows the following PlantUML script:

On the right, the 'test.pu Preview' window shows the rendered diagram. The diagram is titled 'The Title' and features several components and relationships:

- Some Group**: A package containing **First Component** and **Another Component**. They are connected by an **HTTP** interface.
- Other Groups**: A node containing **Second Component**, which is connected to **FTP**.
- Example 1**: A cloud-shaped component connected to **Another Component** and **Folder 3**.
- MySql**: A database component containing **Frame 4** (under a **Foo** frame) and **Folder 3** (under a **This is my folder** folder).

Red arrows indicate the mapping from the code elements to the diagram components. The status bar at the bottom shows 'File 0', 'Project 0', 'No Issues', 'test.pu', '10:27', 'LF', 'UTF-8', 'PlantUML', 'master', '+2', '+28', and '5 updates'.
